

case study. sector - food manufacturing.

food for thought.

We have worked in partnership with our client – one of the UK's largest food and drink brands - for over 5 years and provide integrated waste solutions across four operational sites, helping drive landfill diversion via the conversion of general waste to Solid Recovered Fuel.

challenge.

Drive continuous improvement, reduce waste and costs.

solution.

We identified and implemented a pro-active programme of site-specific innovations to reduce waste and costs. Key projects included:

- Plastic granulation
- Effluent processing
- Can crushing
- Line side signage and segregation
- General waste hand sortation segregation
- Material diversion from baling to reuse to increase rebates
- Installation of new balers and compactors to maximise payloads
- Implementation of Duty of Care and Compliance

results.
